

Walking Your Dog Off Leash is like Picking Your Nose.

It's only ok if nobody sees you do it.

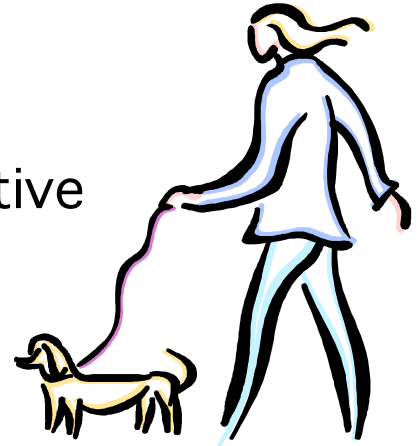

(But it's still technically against the rules.)

It's not good enough that you know your dog is friendly or safe or that you have control.

Your dog should also look safe and controlled to other people, meaning that your dog is on leash or being held to prevent an unwanted greeting.

People on this path may:

- Have a dog that is shy or reactive
- Be afraid of dogs
- Be allergic to dogs

Please help us all out. Attach a leash or shorten your flexi-leash when you see other people or before blind corners.

A public service message of Ahimsa Dog Training, posted by one of your neighbors.
